GARBO AROUND THE WORLD

The will of Angelo Garbo, skilled craftsman and entrepreneur dedicated to the creation of custom-made furnishings, gave birth in 1904 to Garbo Arredamenti in Albignasego, near Padua, where the management team of the entire structure still resides.

The passing of the years has seen the alternation of following two generations, from his son Giorgio to the current sole shareholder of the company, Denis Garbo, who, while maintaining an artisan connotation, manages with extreme competence and dedication, demanding and prestigious orders on the national and international territory.

Over the years, thanks to experience, ambition, entrepreneurial spirit, passion for the production process, a highly motivated and qualified workforce and a network of meticulous Made in Italy artisans, Garbo has grown and changed by developing new visions and business models.

In 2013 Denis decided to diversify the core business of the creation of custom-made furnishings, giving life to the Garbo Quality Brand, a company entirely dedicated to the development and implementation of "turnkey" projects capable of re-proposing the quality of Garbo Arredamenti

at 360 °, from phase planning to the management of the construction site.

From 2020 Garbo continues to grow, taking the current form of a Group which includes: Garbo Italia specialized at international level in the realization of large retail, contract, offices and business centers projects, and Garbo Luxury with operational headquarters in the UK dedicated to the private sector with residential projects of prestige with particular attention to work ethic and choice of materials in the name of sustainability and respect for the environment.

The Family History

Our vision is to create and spread well-being and beauty in environments that allow you to live in a world governed by the culture of sustainability, suitable for man.

Our mission is to design and produce "made in Italy" furniture elements, beautiful, comfortable, long-lasting, sustainable, healthy, which put people at ease using natural, certified and controlled materials, compatible with the environment and in line with the philosophy of the brand for which we produce them.

Why Garbo?

Because we make 100% "tailor-made", because our estimates are real and therefore cost control is certain, because we guarantee certainty in the result, certain delivery dates, continuous dialogue with reference persons always available, We leave nothing to chance, we are experts in turnkey and organized, we are partners and not suppliers and we constantly research, without foreclosures. Typical scenario is the studio that provides us with the project, we estimate it with the colors and finishes defined by the studio, possibly "revised" with our revision proposals in line with the values expressed. The following services can be added to the realization of the

products present in the project that we will define with the clients and which can be in scale:

- Preparation for worldwide transport
- Assembly of products in foreign countries
- Turnkey solution as General Contractor with the taking charge of building renovation, floors, false ceilings, plasterboard, plumbing and air conditioning, painting, wallpaper and any interior finish
- Global post-assembly service solution

Mission,
Model**

Technical Planning Office

The internal technical office ensures complete availability and attention to the wishes and needs of our clients. Research on materials and construction systems helps us to develop innovation and to solidify knowledge about furniture and interior the design sector.

Design

Plan for Passion.

The main talent of Garbo Arredamenti is to design out of passion. The streamlined, flexible organisation is made of figures capable of managing each process independently. This mechanism, which follows a coordinated, precise workflow, attentive to very detail and possible change in the course of work, guides each project from tender to delivery.

Workshop

With the collaboration of expert craftsmen, cutting-edge machinery, and selected suppliers of raw materials, our laboratory is the ideal space to develop and test the ideas of our clients.

The Company System

Taylor Made

“First of all, we are able to design and build from scratch, that is, from the drawing without using standard accessories available from the catalog, complex and serial set-ups”

60+ Years

“Three generations of projects without limits”

In the World

“We have carried out projects ambitious on 3 continents and beyond 10 different countries in the last 4 years ”

Team

“We have a team composed of different skills: from design to technical advice, to the mastery craft”

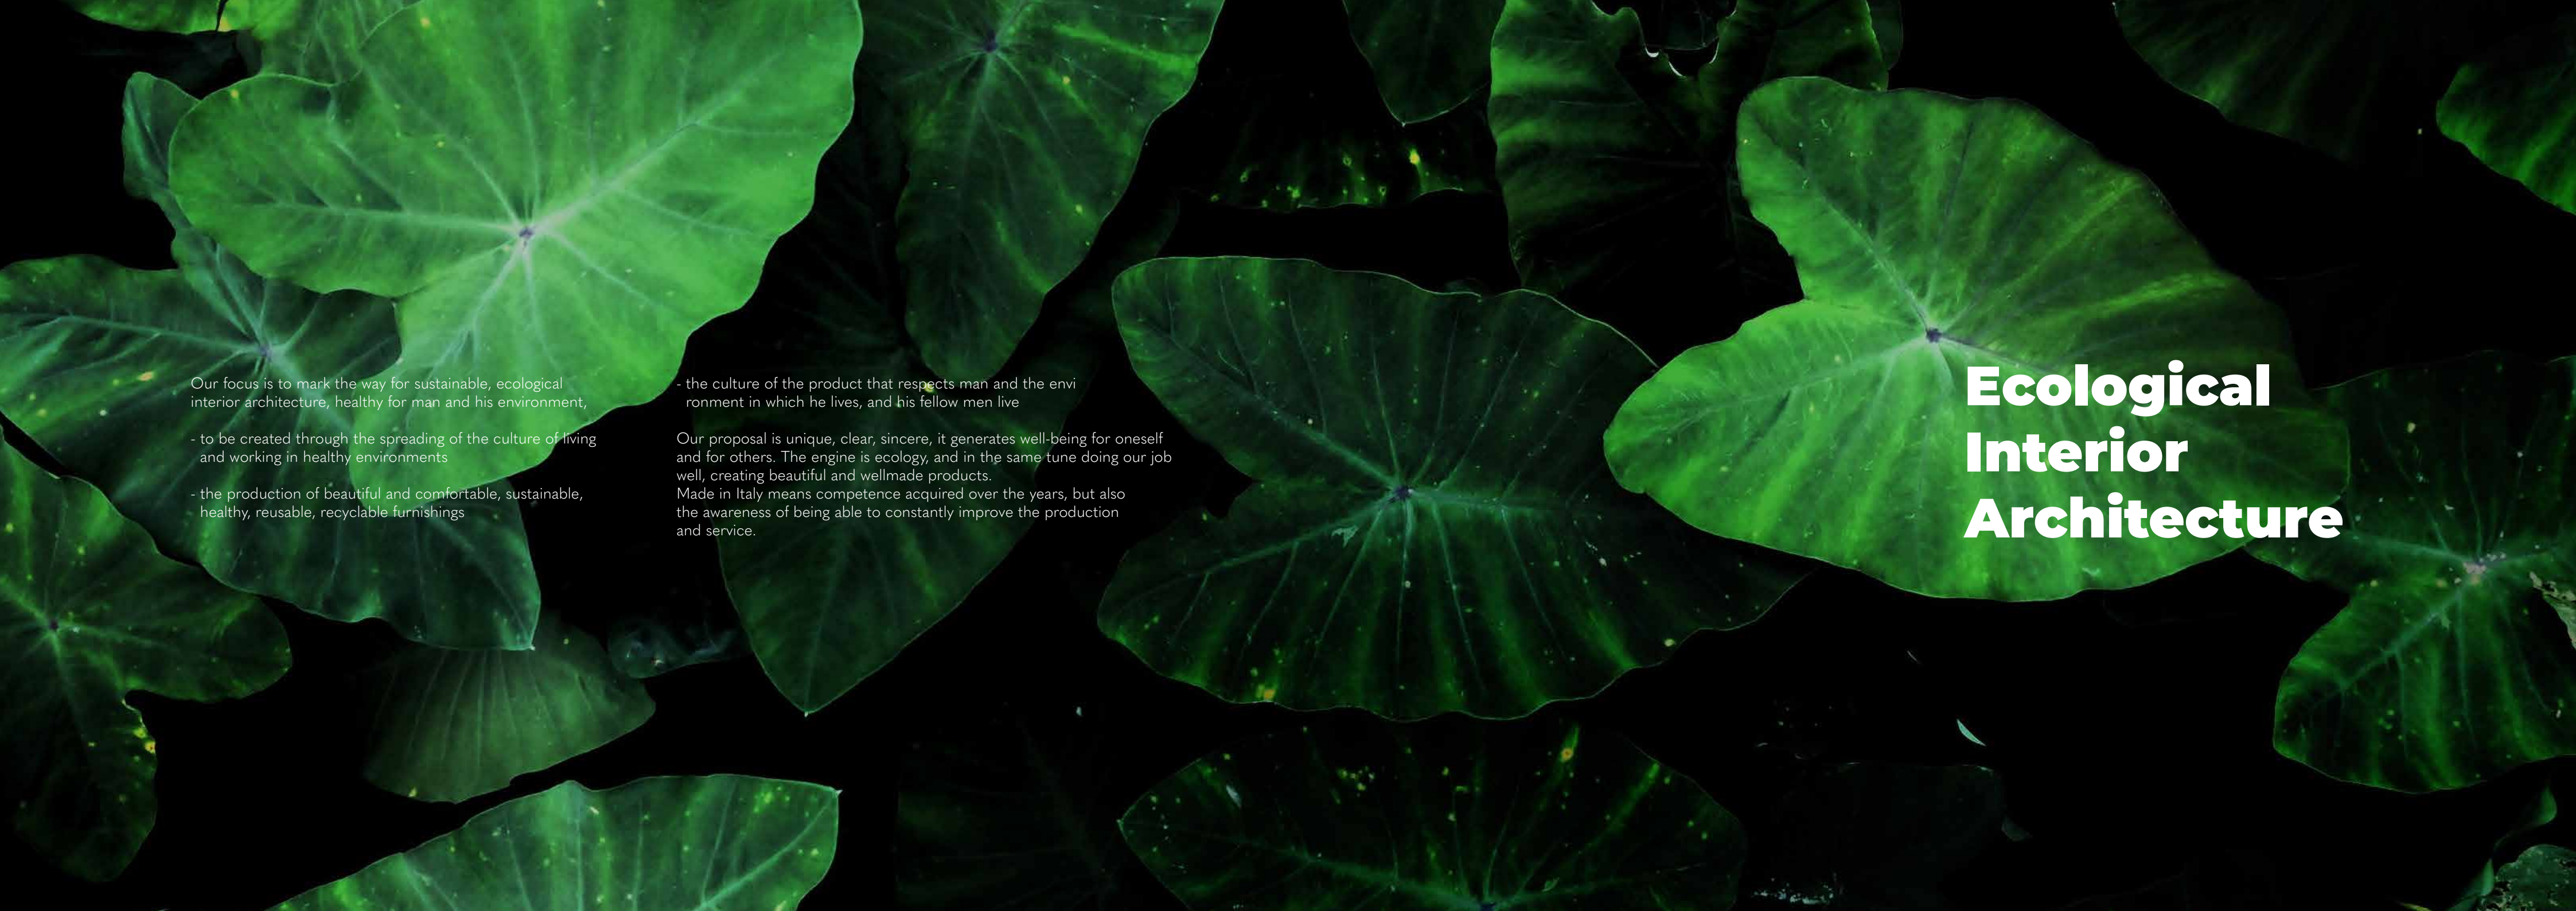

Work Area

“1200 sqm for the processing of materials, 500 sqm of laquering plant, 3000 sqm of logistics and storage of materials, 500 sqm of exhibition space and offices ”

15000 smq of shops

“Every year we deliver 15000 sqm of bespoke interior fittings.”

Our focus is to mark the way for sustainable, ecological interior architecture, healthy for man and his environment,

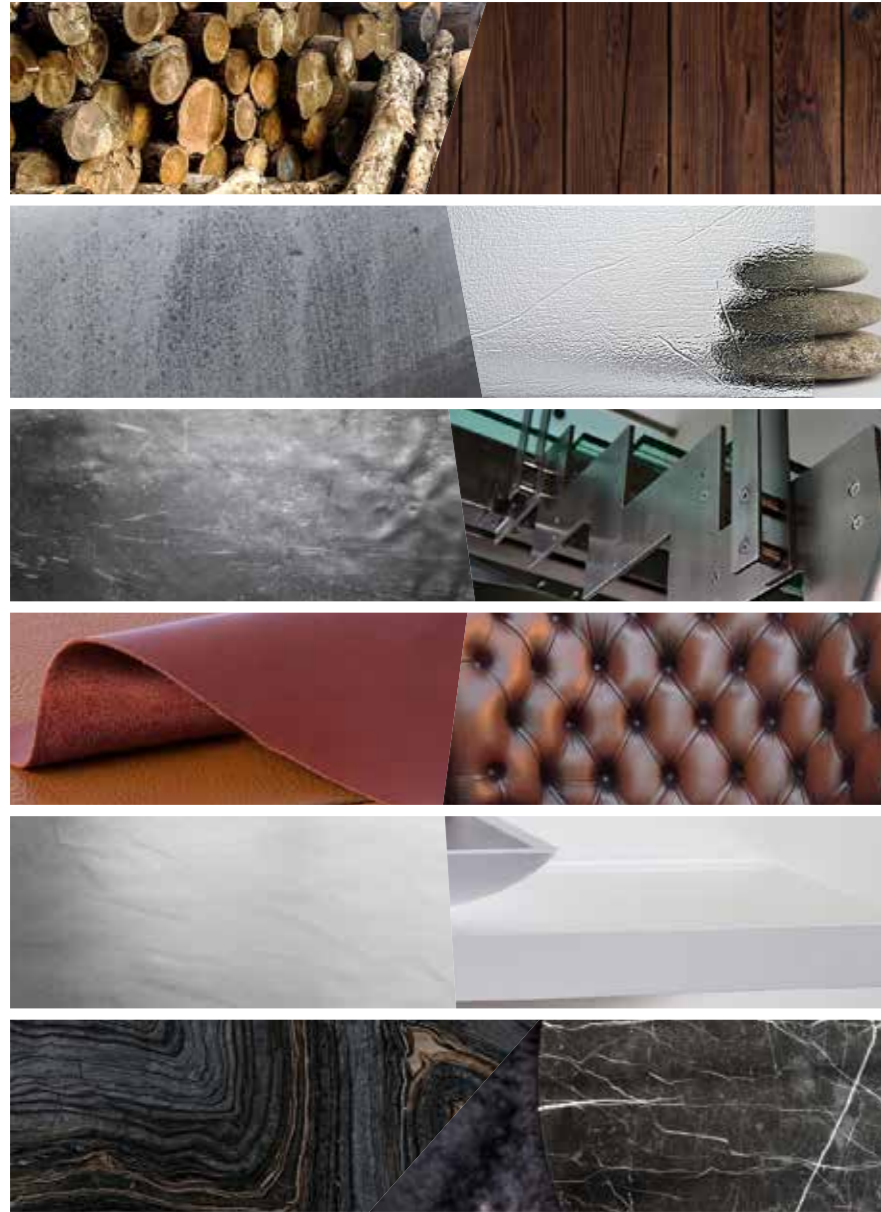

- to be created through the spreading of the culture of living and working in healthy environments

- the production of beautiful and comfortable, sustainable, healthy, reusable, recyclable furnishings

- the culture of the product that respects man and the environment in which he lives, and his fellow men live

Our proposal is unique, clear, sincere, it generates well-being for oneself and for others. The engine is ecology, and in the same tune doing our job well, creating beautiful and wellmade products. Made in Italy means competence acquired over the years, but also the awareness of being able to constantly improve the production and service.
